Test your knowledge on data-cleaning techniques

TOTAL POINTS 3

1. What is the process of combining two or more datasets into a single dataset?

1 / 1 point

- ☐ Data validation
- ☐ Data composition
- ☐ Data transferring
- ☒ Data merging

Correct

Data merging is the process of combining two or more datasets into a single dataset.

2. Fill in the blank: In data analytics, ____ describes how well two or more datasets are able to work together.

1 / 1 point

- ☒ compatibility
- ☐ alignment
- ☐ suitability
- ☐ agreement

Correct

Compatibility describes how well two or more datasets are able to work together.

3. Data analysts use spreadsheet tools such as conditional formatting, remove duplicates, and split text to columns for data analysis. These tools are not applicable to the data-cleaning process.

1 / 1 point

- ☐ True
- ☒ False

Correct

Spreadsheet tools such as conditional formatting, remove duplicates, and split text to columns are very helpful when cleaning data.
