# Test your knowledge on documenting the cleaning process

TOTAL POINTS 3

1. Why is it important for a data analyst to document the evolution of a dataset? Select all that apply.

1 / 1 point

☒ To determine the quality of the data

**Correct**

It is important to document the evolution of a dataset in order to recover data-cleaning errors, inform other users of changes, and determine the quality of the data.

☐ To identify best practices in the collection of data

☒ To recover data-cleaning errors

**Correct**

It is important to document the evolution of a dataset in order to recover data-cleaning errors, inform other users of changes, and determine the quality of the data.

☒ To inform other users of changes

**Correct**

It is important to document the evolution of a dataset in order to recover data-cleaning errors, inform other users of changes, and determine the quality of the data.

2. Fill in the blank: While cleaning data, documentation is used to track \_\_\_\_\_. Select all that apply.

0.75 / 1 point

☒ bias

**This should not be selected**

While cleaning data, documentation is used to track changes, deletions, and errors.

☒ errors

**Correct**

While cleaning data, documentation is used to track changes, deletions, and errors.

☒ deletions

**Correct**

While cleaning data, documentation is used to track changes, deletions, and errors.

☒ changes

**Correct**

While cleaning data, documentation is used to track changes, deletions, and errors.

3. Documenting data-cleaning makes it possible to achieve what goals? Select all that apply.

1 / 1 point

☐ Visualize the results of your data analysis

☒ Demonstrate to project stakeholders that you are accountable

**Correct**

Documenting data-cleaning makes it possible to be transparent about your process, keep team members on the same page, and demonstrate to project stakeholders that you are accountable.

☒ Keep team members on the same page

✓ **Correct**

Documenting data-cleaning makes it possible to be transparent about your process, keep team members on the same page, and demonstrate to project stakeholders that you are accountable.

✓ Be transparent about your process

✓ **Correct**

Documenting data-cleaning makes it possible to be transparent about your process, keep team members on the same page, and demonstrate to project stakeholders that you are accountable.
