TensorFlow Serving

Latest Submission Grade 100%

1. What is the most straightforward way of installing TensorFlow Serving?

1 / 1 point

- ☐ Building it from source
- ☐ Using Available Binaries
- ☒ Using Docker Images

Correct

Good Job! This route is the most recommended unless there are specific needs not addressed by running in a container.

2. What is the advantage of using the **TensorFlow-model-server-universal** binary to install TensorFlow Serving over the **TensorFlow-model-server** binary?

1 / 1 point

- ☒ The universal binary works on most of the machines.
- ☐ The universal binary includes platform-specific instruction sets.
- ☐ The universal binary is a fully optimized server.

Correct

Spot on! TensorFlow-model-server-universal should work on most if not all machines out there since it doesn't include any platform-specific instruction sets.
