Test your knowledge about documentation and reports

TOTAL POINTS 4

1. Fill in the blank: Markdown is a ____ for formatting plain text files.

1 / 1 point

- ☐ file application
- ☐ coding language
- ☒ syntax
- ☐ guide

Correct

Markdown is a syntax for formatting plain text files.

2. A data analyst creates an interactive version of their R Markdown document to share with other users that allows them to execute code the analyst wrote. What did they create?

0 / 1 point

- ☐ An HTML report
- ☒ A markdown
- ☐ A code chunk
- ☐ An R notebook

Incorrect

They created an R notebook, which is an interactive R Markdown option. It lets users run code from the R Markdown document and displays charts and graphs to visualize that code. Markdown is a syntax for formatting plain-text files.

3. A data analyst wants to convert their R Markdown file into another format. What are their options? Select all that apply.

0.5 / 1 point

- ☒ HTML, PDF, and Word

Correct

R Markdown files can be converted into HTML, PDF and Word, slideshow presentations, or dashboards.

- ☐ JPEG, PNG, and GIF
- ☐ Dashboard
- ☐ Slide presentation

You didn't select all the correct answers

4. A data analyst has finished editing their R Markdown file and wants to save it as an HTML report. What tool will they use?

1 / 1 point

- ☐ Hashtags
- ☐ Output
- ☐ Save
- ☒ Knit

Correct

The knit button will produce a report containing all text, code, and results from the R Markdown file.
