Test your knowledge on data integrity and analytics objectives

TOTAL POINTS 3

1. Which of the following principles are key elements of data integrity? Select all that apply.

0.75 / 1 point

☐ Selectivity

☒ Consistency

✓ **Correct**

Data integrity is the accuracy, completeness, consistency, and trustworthiness of data throughout its life cycle.

☒ Accuracy

✓ **Correct**

Data integrity is the accuracy, completeness, consistency, and trustworthiness of data throughout its life cycle.

☐ Trustworthiness

You didn't select all the correct answers

2. Which process do data analysts use to make data more organized and easier to read?

1 / 1 point

☐ Data replication

☒ Data manipulation

☐ Data transfer

☐ Data uniformity

✓ **Correct**

To make data more organized and easier to read, data analysts use data manipulation.

3. Before analysis, a company collects data from countries that use different date formats. Which of the following updates would improve the data integrity?

1 / 1 point

☐ Leave the dates in their current formats

☐ Organize the data by country

☐ Remove data in an unfamiliar date format

☒ Change all of the dates to the same format

✓ **Correct**

Changing all of the dates to the same format would improve the data integrity.
