## Test your knowledge on metadata

TOTAL POINTS 4	
<ol> <li>A large company has several data collections across its many departments. What kind of metadata indicates exactly how many collections a piece of data lives in?</li> <li>Representative</li> <li>Administrative</li> <li>Structural</li> <li>Descriptive</li> </ol>	1/1 point
Correct Structural metadata indicates exactly how many collections data lives in. It provides information about how a piece of data is organized and whether it's part of one, or more than one, data collection.	
<ul> <li>2. The date and time a photo was taken is an example of which kind of metadata?</li> <li>Descriptive</li> <li>Structural</li> <li>Administrative</li> <li>Representative</li> </ul>	1/1 point
Correct The date and time a photo was taken is an example of administrative metadata. Administrative metadata indicates the technical source and details for a digital asset.	
3. A large metropolitan high school gives each of its students an ID number to differentiate them in its database. What kind of metadata are the ID numbers?  Structural  Descriptive  Administrative  Representative	1/1 point
Correct The ID numbers are descriptive metadata. Descriptive metadata describes a piece of data or can be used to identify it at any time.	
<ul> <li>A company needs to merge third-party data with its own data. Which of the following actions will help make this process successful? Select all that apply.</li> <li>Replace the incoming data's metadata with its own company metadata.</li> <li>Use the metadata to standardize the data.</li> </ul>	1/1 point
Correct The company can use the metadata to standardize the data and evaluate the third-party data's quality and credibility.	
<ul> <li>☐ Alter the company's metadata to more closely reflect the incoming metadata.</li> <li>☑ Use the metadata to evaluate the third-party data's quality and credibility.</li> </ul>	
Correct The company can use the metadata to standardize the data and evaluate the third-party data's quality and credibility.
