Calculations across Sheets

TOTAL POINTS 3

1. In order to use values in other worksheets in a calculation, you must first copy them into the worksheet containing the calculation.

    `1 / 1 point`

    ○ True

    ◉ False

    ✓ **Correct**
    Well done- you have paid excellent attention to the content of this week's video on **Calculations across Sheets**.

2. The formula **=Sheet1!A2*A2** tells Excel to:

    `1 / 1 point`

    ○ Apply an absolute cell reference to **A2**

    ○ Put the value in **A2** in **Sheet1** into the **A2** in the current sheet

    ◉ Multiply the value in **A2** in **Sheet1** by the value in **A2** in the current sheet

    ○ Put the value in **A2** in the current sheet into **A2** in **Sheet1**

    ✓ **Correct**
    Well done. This was a tricky question. You have paid excellent attention to the content of this week's video on **Calculations across Sheets**.

3. When you reference cells on other sheets in a calculation you can use relative references to copy that formula to other cells.

    `1 / 1 point`

    ◉ True

    ○ False

    ✓ **Correct**
    Yes, well done.
